Enclosure - Page 1 of 1
GLASS TYPE LEVEL INDICATOR

Reference documents:

SOMET technical drawings approved with n° PPVT-2311 on 5th March 2008
Report of tests performed in Rijeka on 27th March 2008 in the presence of RINA.

Technical characteristics

As indicated in the aforementioned drawings/documentation, as appropriate.

Fields of application and limitations

The above mentioned devices are not to be used on passenger ships, on flammable oil tanks, as the device penetrates the tanks themselves below the tank top.

Version A, B and C of said device may be used as engine room tank level indication only for water

Version D of said device may be used as engine room tank level indication for water, fuel oil, lubricating oil and other fluids having flash point higher than 60°C.

Installation

The welding details of device connection to tank's wall and relevant testing are to be to the satisfaction of RINA Surveyor.

The selection of the devices for the corresponding services and correct installation are also to be in accordance with the instructions of the Manufacturer.

The said devices are to be suitably protected against mechanical damage.

Remarks

The installation on board ships has to comply with Regulations II-2/4.2.2.3, II-2/4.2.3 of SOLAS 1974 as amended and with the applicable RINA Rules.
